BRIEF REPORT ON INAUGURATION OF "FACELIFT OF B.A.RC. GUEST HOUSE AND TRAINING SCHOOL HOSTEL, ANUSHAKTINAGAR, MUMBAI"

The Facelift was inaugurated by Dr. A. K. Mohanty, Chairman, AEC & Secretary, DAE in the presence of Shri Vivek Bhasin, Director, BARC, Shri K. Mahapatra, Director, DCSEM, Shri A. S. Yadav, Chief Engineer, DCSEM, Shri Rajeev Nayan, CE PCD, DCSEM and various senior officials of DCSEM, DAE, and Hosteler of TSH, on 29th October 2024.

The concept behind the Facelift of the existing BARC Guest House and Training School hostel emphasizes unity and balance in architectural design. This refers to seamlessly integrating various design elements to create a cohesive, functional, and visually appealing structure. By blending contemporary design features with the existing structure, the space offers an imp roved experience for its occupants without compromising harmony with the environment. Using consistent materials that complement the original structure while adding a modern touch will strengthen this sense of unity. For instance, incorporating warm-toned wooden panels along with natural stone finishes can establish a harmonious balance between modernity and tradition. Balance in architectural design entails achieving equilibrium amon g all visual and structural elements, ensuring that no aspect of the landscaping feels overly heavy or light and that all spaces are proportionate and in sync with one another.
